

Alpha Grant Advisory Services

Alpha Management has considerable experience in applying for and winning EU and local government grants on behalf of our clients. Speaking local and English languages we bridge the gap between your business and the implementation agency that awards grants.

Our consultants give expert advice tailored to the needs of our clients every step of the way. We are at your disposal from the very start of the grant process outlining opportunities that most suit your business plan, through the application process and negotiations with government authorities, the receipt of money on your account, and for assistance during the periodical project audits.

You can choose whether you would like Alpha to manage the whole application process or can commission our team to provide any of the following services:

- initial screening of grant opportunities
- assessing the probability of receiving a particular grant
- assessing the likely award amount
- developing a project plan in cooperation with your team
- preparing a grant application for your project and managing the process
- negotiations with implementation agencies and government ministries
- preparing additional documents & reports to the aid providers
- assisting with project audits
- With Alpha your chances of receiving a grant increase significantly. We are proud of our 100% success rate and advise companies in all regions of the Czech Republic, Slovakia and Poland.

Alpha has particular expertise in:

- Manufacturing Grants
- Technology Centre Grants
- Training & Re-training grants
