

Case Study

AGRAMKOW Fluid Systems S.A.

A Danish company established by Danish inventor and developer Mr. Asger Gramkow has become world leader in the evacuation, charging and leak detection of refrigerants in the production of household, commercial and industrial cooling and freezing equipment as well as in the production of airconditioning units.

AGRAMKOW also offers integrated testing and production line information systems for the refrigeration and airconditioning industries and the company's technologies and services are known for unparalleled reliability and safety.

AGRAMKOW's tailored offerings promise to deliver a fast return on investment and contribute to the customer's competitiveness.

Alpha Management was commissioned to represent AGRAMKOW in the Czech and Slovak Republics and through this partnership AGRAMKOW has been successful in selling its equipment to the major domestic refrigeration and airconditioning manufacturers.
